

Filomuro

The wall fancoil

**We wanted to create the best
high wall fancoil. Today, it is
also smaller.**

SWI

Filomuro

SW

SW XL

Filomuro

**The thinnest and most
quietest in its class.**

Filomuro range fan coils stand out for their depth: only 128 mm. The minimum visual encumbrance to fit elegantly into any environment, domestic or office, and adapt to any type of furniture.

An extremely thin and also super silent fancoil thanks to a careful study of the product design, the choice of the best materials-such as the metal structure that minimizes vibration-and the perfectly optimized tangential fan.

More space for furniture and furnishings

All the main functions can be set directly on the unit thanks to the highly intuitive touchscreen display, with the infrared remote control or with remote control. .

A design solution - made entirely of metal - that perfectly meets the needs of architects and designers who, thanks to Filomuro, no longer have boundaries in interior design.

A fan coil that guarantees heating, cooling and dehumidification, minimizing the overall dimensions and operating costs.

Wall installation

Filomuro Slim Fit
Filomuro Slim Fit XL

Built-in installation

Filomuro Incasso

Wall installation

Built-in installation

A concentrate of technology

All the main functions can be set directly on the unit with the high-intuitive touchscreen display, with the infrared remote control or with remote control.

Thanks to the Web Server card cabled in the local network, it is possible to remotely manage the various fancoils.

Fancoils in the Filomuro range can also be integrated with current remote control systems and interfaced easily with the most popular home technology systems

Control mode

Advanced and easy controls Wi-Fi, ModBus or Bluetooth

By the touch screen
and remote control

By remote control
(optional)

THIN

Extremely slim (only 128 mm), fancoils of the Filomuro range fits to any residential dwelling reducing at maximum its presence and adapting to any type of internal decoration.

SILENT

An accurate design of the product structure along with the use of state of the art materials and a tangential fan perfectly optimized, allow to reach unbelievably low noise levels.

MODULATED AIRFLOW

Thanks to its continuous modulating motor, all inconveniences of standard “on off” products are eliminated- the air stream is modulated and never disturbing.

FULL METAL BODY

The full metal body structure gives stiffness, absence of vibrations and long life of the unit.

DC INVERTER

Thanks to the newest DC Inverter technology, fan coils in the Filomuro range have extremely low electrical consumption and perfect stability of functioning.

TOUCH-SCREEN

All main functions can be selected straight on board thanks to a large and easy to use display.

INFRARED REMOTE CONTROL

The remote control permits the best flexibility and easiness of use – push buttons have large dimensions and pictograms are clear and easy to understand.

ETHERNET / DOMOTICA

Fancoils in the Filomuro range can be integrated with the most complex and modern systems of remote management thanks to sophisticated electronics that can be easily integrated with the most diffused building management systems.

The versions

Filomuro Slim Fit

The INNOVA wall-mounted fancoil in the version with exposed view, able to express the maximum of elegance.

Now it is even more compact with a reduced width of 11 cm in relation to the previous version.

Filomuro Incasso

The wall-mounted INNOVA totally recessed fancoil with rasomuro installation thanks to a concealed aesthetic cover panel.

Filomuro Slim Fit XL

With more depth and more power.
Now even more compact with a reduced
width of 11 cm in relation to the previous
version.

Filomuro Slim Fit

EXTREMELY SLIM

Width reduced by 11 cm compared with the previous version.

MODULATED AIRFLOW

DC INVERTER

Maximum comfort with the lowest consumption.

QUIET OPERATION

The wall-mounted fancoil high wall

Filomuro Slim Fit (SW) is characterized by an extremely reduced depth (only 128 mm) and even reduced width with 11 cm smaller than the previous version. Extremely refined and elegant design able to fit into any environment.

Modulated air flow

Maximum comfort with minimum consumption

Filomuro Incasso

RASOMURO

Aesthetic cover panel
flush with the wall.

MODULATED AIRFLOW

DC INVERTER

Maximum comfort with
minimum consumption.

QUIET OPERATION

Fully aligned with the wall

Filomuro built-in (SWI) is the innovative solution that allows water terminals to be recessed into the upper wall, therefore able to provide summer and winter comfort without taking up any useful space.

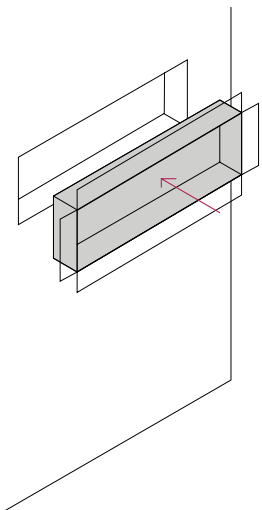

Complete for top-quality installation

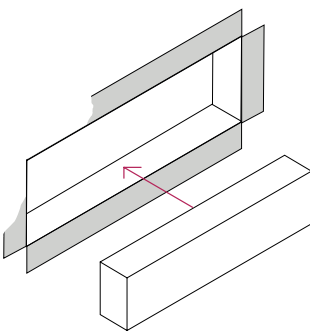

Built-in metal formwork and cosmetic flush-mounted cover panel for perfect integration in the surrounding architecture.

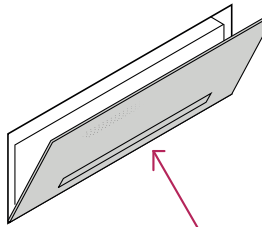

- A Formwork complete with adhesive plaster holder nets.
Cod. L01045II - L01046II - L01047II
- B Vertical rasomuro aesthetic panel.
Cod. LC1092II - LC1093II - LC1094II

Installation phases flush-mounted wall

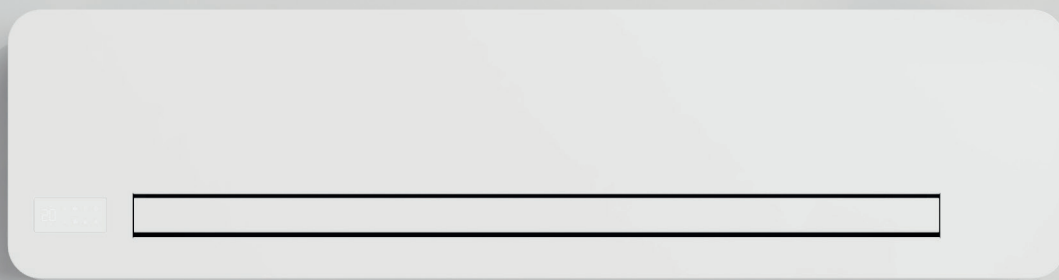

- 

1. Positioning of the recessed formwork in the wall complete with front support panel to prevent deformation of the formwork during installation.
- 

2. Performing the shaving of the wall. Connecting the connections to the system from three different positions, from the back, side or bottom.
- 

3. Installing rasomuro aesthetic panel.

Filomuro Slim Fit XL

MAXIMUM POWER

MODULATED AIRFLOW

DC INVERTER
Maximum comfort with
minimum consumption

QUIET OPERATION

The Filomuro with the most power

Extra power is sometimes needed for installations in large halls or indoor areas, for instance.

Filomuro XL (SW XL), capable of generating extra power with a minimum increase in the depth of the appliance, was created specifically for these needs.

Hydraulic connections on the right side only, not reversible.

Total cooling capacity

● SW XL
● SW

Heating capacity

● SW XL
● SW

So much more for so little.

Easy installation

1 Slim depth

Compared with the previous series, the Slim Fit versions reduce the width by 11 cm for the same size. This is an exceptional technical result that, combined with the sound level and performance, allows perfect positioning in any environment.

2 Display touch screen

Wide, easy to understand and to use: no difficulty in selecting any possible request for the best domestic comfort (as an alternative to the other types of controls).

3 Dx → sx

Hydraulic connections are on the RIGHT and can be fitted on the LEFT only at the factory. For the SW XL version, the hydraulic connections are only on the right and are not reversible.

SW XL

Filomuro

BUTLER PRO, il controllo evoluto dell'impianto

The BUTLER PRO web server is the system that INNOVA has developed to control an entire winter and summer air conditioning system from a local and remote network.

BUTLER PRO allows you to connect the heat pump, controlled mechanical ventilation system, fan coils and all the other system elements via a serial connection.

BUTLER PRO is complete, simple and intuitive at the same time: you can configure a weekly calendar with time zones, create specific zones and change the settings so your home is at the right comfort level for your needs.

TWO VERSIONS

BUTLER PRO

settings and display via smartphone / tablet / computer only with internet connection. Installation on a 35 mm DIN rail in the electrical cabinet of the heat pump or in the electrical cabinet of the house.

Display

BUTLER PRO
via WEB

PC locale

Mobile o tablet

BUTLER PRO TOUCH

settings and display via the integrated 10" touch screen. Can be connected to the internet remotely via smartphone / tablet / computer. Recessed wall installation. The pre-installation box is supplied separately.

ROOM-BASED CONTROL

You can control each room with BUTLER by configuring a weekly calendar with time zones, creating settings for each room or area, modifying the settings so your home is at just the right comfort level for your needs.

MAIN FUNCTIONS

- **Supervision and control through local network or remotely**

The system can be managed through a smartphone, tablet or computer

- **Summer and winter personalised programming**

Different programmes can be set for each season

- **Setting of three temperature levels on the INNOVA fan coil network**

For each room or zone it is possible to select 3 different work temperatures, which can be modified at any time

- **Weekly time programming**

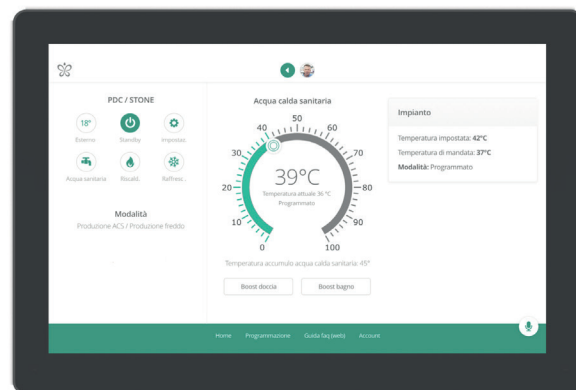

In each room it is possible to set different operating times

- **Etnwork interface like the one on PCs**

Once the bus network between the heat pump and the fan coils has been made, the connection with the Web server is the same as that of a normal computer

- **Remote assistance**

With the user's consent, BUTLER can automatically access the INNOVA cloud for diagnostics and assistance in case of need

A WEEKLY SCHEDULING

B DOMESTIC HOT WATER SETTINGS

Remote assistance

With the user's consent, BUTLER can automatically access the INNOVA cloud for diagnostics and assistance in case of need.

Thanks to the Internet connection, it is possible to verify remotely the correct operation of INNOVA products connected to the BUTLER.

Any operating anomalies can be transmitted automatically from the BUTLER to the assistance centre which can intervene by modifying the functional parameters or decide to physically intervene by providing a quick and timely service.

Total control

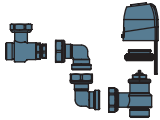

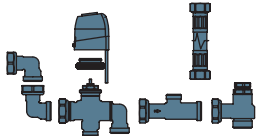

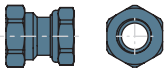

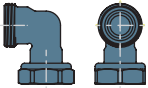

The advantage of choosing a complete INNOVA system is that, for any need, we are the only reference both for routine maintenance and for assistance purposes. A complete and high quality service.
