Model 13 - 15

Kit assembly

The kit can be installed in the vertical position only.

- ⚠ Before installing the aesthetic panel, check that all the arrangements for the hydraulic and electrical connections have been made inside the metal casing.
- ⚠ It is necessary, for right functioning of the device, that during the whole installation phase the working space remains clean.
- ⚠ Regularly clear away waste offcuts, debris or dirt in the metal casing.

Installation

- bring the front panel closer to the unit
- fix the panel with two screws in the upper part of the panel
- hook the upper frame with grid
- install the brackets on the air intake panel
- attach the panel to the unit
